Subject: RE: Oak Park Speed Studies

Hi Crystal,

We just got done with our search for speed studies within the last year. There is not a simple report to share. Each report contains a per-day hourly breakdown of: the number of vehicles, the speeds of vehicles in one direction, the speeds of vehicles in the opposite direction, and the daily total speeds for both directions. Each location generally has a week of data. We do not have a summary combining each day's worth of data into a weekly summary.

The speed studies we performed within the last year are listed below. I can send the reports if needed.

- Intersection of Tamarind & Pinewood (four reports) – April 2025 – Stop sign request; Results: all-way stop not warranted, speed humps are warranted for Tamarind.
- Trousdale St (one report) – May 2025 – Speed hump request; Results: not warranted.
- Oak Springs Dr (one report) – June 2025 – Speed hump and stop sign request; Results: not warranted.
- Dumaine Ave (two reports) – August 2025 – Speed hump request; Results: not warranted.

  Hollytree Dr (one report) – December 2025 – Resurvey for speed limit

recertification, no change necessary.

- Conifer St (two reports) – December 2025 – Resurvey for speed limit recertification, no change necessary.

Also, on 10/29/2025, there were annual traffic counts performed at 4 locations in Oak Park to count vehicles only, not speeds.

- Kanan Rd east of Lindero Canyon Rd
- Kanan Rd east of Hollytree Dr/Oak Hills Dr
- Kanan Rd south of Tamarind St
- Deerhill Rd north of Kanan Rd

That count data is available on our webpage:
https://s47609.pcdn.co/wp-content/uploads/2024/05/2025-ADT-Booklet.pdf

Best regards,

Matt

Hello Anitha,

I am circling back on this request. Hopeful that it is a simple report to share.

Thank you!

Subject: Oak Park Speed Studies

Hello Anitha,

The OP MAC is requesting results from speed studies done in the fall of last year around Oak Park.
Is there a simple report that we can share as a receive and file?

Thank you,

Crystal Stratton
