

Kanan Monument and Tamarind Community Sign – Annuals vs. Perennials

	Kanan Monument (16' x 17')	Kanan Monument (16' x 12')	Tamarind Community Sign
Cost Included in Existing Contract	Unknown	Unknown	Unknown
Annuals Estimate (cost not to exceed)	\$7,306.50	\$4,895.36	\$4,728.25
Perennials Estimate (cost not to exceed)	\$4,603.15	\$3,084.11	\$4,124.35

Assumptions / Notes

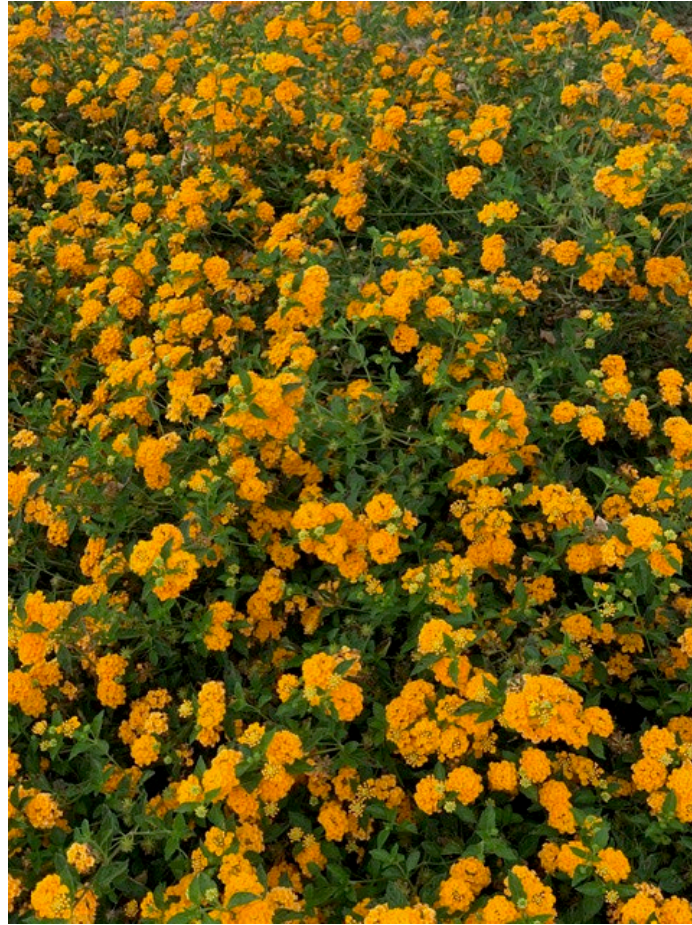

1. Cost Comparison: Unable to compare plant costs already included in contract to new “cost not to exceed” estimates. Awaiting clarification from PWA.
2. Kanan Monument: Reduction of plant bed depth by 1/3 will translate to 1/3 reduction of “cost not to exceed” estimate. Backfill with no irrigation, fire resident material (med/large river rocks or medium boulders).
3. Tamarind Community Sign: No changes to area size. Need confirmation by Mariposa as “costs not to exceed” estimates seem out of alignment to that of the monument sign, even though the square footage is much less.
4. Perennials – Roses: Not considered due to regular and safe access requirement to Community Sign.
5. Perennials – Lantana: Offers nice color and trailing lantana won’t exceed the maximum height of 16” for the monument. Will die back during extreme low temperature days in winter and may require replanting, pruning at minimum. Refer to prior OP lantana before and after photos (provided by Mariposa Landscaping).
